# Maryland switched from the system that Georiga uses now to hand-marked paper ballots.

A Poll Supervisor for Prince George's County Maryland since 2004 compares the systems:	Old Accuvote DRE system	Hand Marked Paper Ballots scanned at each polling place
Time to get results after poll closing	1 to 2 hours	15 to 20 minutes
Poll worker steps to setup and close down machines	940 steps (10 voting machines)	88 steps (1 scanner and 1 BMD)
Expansion on election day	no options for expansion to accommodate times of peak demand	allows greater flexibility in meeting changing needs throughout election day
Wait times to check in	As long as 105 minutes	No more than 10 minutes
